THEOCHEM, VOLUME 64 (1990)

(Journal of Molecular Structure, Vol. 205)

SUBJECT INDEX

Active sites
The influence of proton transfer on the metal–substrate interaction in the active sites of zinc dependent enzymes, 113
Additivity
Analysis of multipath transmission of spin–spin coupling constants in 1-X-bicycloalkanes. Part II. Additivity of coupling pathways, 79
Agonists
Reference conformations for calcium antagonists and agonists of dihydropyridine type, 1
Aminoanthracyclines
Aminoanthracyclines: physicochemical properties as predicted by ab-initio molecular orbital calculations, 169
Anisotropy
Anisotropy of electron-density distribution around atoms in molecules: N, P, O and S atoms, 191

Base pairs
Molecular-orbital study of the relative stability of protonated nucleic acid base pairs, 119
Bicycloalkanes
Analysis of multipath transmission of spin–spin coupling constants in 1-X-bicycloalkanes. Part 1. The through-space transmission via the bridgehead carbon atoms, 63

Analysis of multipath transmission of spin–spin coupling constants in 1-X-bicycloalkanes. Part II. Additivity of coupling pathways, 79
n-Butane
Rotational potential energy surface and hyperfine structure of the n-butane cation, 317

Calcium antagonists
Reference conformations for calcium antagonists and agonists of dihdropyridine type, 1
Carbonium ion intermediates
Cyclic and open-chain carbonium ion intermediates in nucleophilic halogen displacement: 2-chloroethanol, 2-chloroethanethiol and their 1,3-propane homologues. A theoretical ab-initio MO approach, 177
Coronoid hydrocarbons
A note on the classification and enumeration of coronoid hydrocarbons, 361
Counter-ion effects
Calculation of thermochemical parameters for $CH_nX_{3-n}^- \rightarrow: CH_nX_{2-n} + X^-$, $n = 0$, 1 and 2, X = Cl and Br. MO study of solvent and counter-ion effects, 287
Cyclopentylcarboxylic acid fluoride
Conformational analysis and structure of cyclopentylcarboxylic acid fluoride, 353

Dihydropyridine
Reference conformations for calcium antagonists and agonists of dihydropyridine type, 1

Electrostatic proximity effects
Electrostatic proximity effects in gas-phase acidities and basicities: a comparison of theoretical methods (INDO, MNDO AM1 and ab initio), 367
Ethylamine
A comparative ab initio MO study of internal rotations in ethylamine and n-propylamine, 327
Ethylene
MNDO study of the radical addition of hy-

drogen halides to ethylene and propene, 213

Ethylenedione radical anion
Is the ethylenedione radical anion linear or bent?, 279

Gaussian functions
Expansion of Hartree–Fock atomic orbitals by a small number of Gaussian functions, 301

HCN
The mass weighting problem of potential energy surfaces for chemical reactions: dissociation and isomerisation pathways of HCN, 245

Hybridization
Bond strength of equivalent hybridization and the maximum-overlap method, 137

Bond strength of non-equivalent hybridization and the maximum overlap method, 151

Hydrogen halides
MNDO study of the radical addition of hydrogen halides to ethylene and propene, 213

Isolated subunits
Basis sets for molecular interactions. Part 3. Properties of isolated subunits, 13

Kinetic energy density
Kinetic energy density as a function of subshell electron densities, 35

Lactonitrile
Ab initio study of lactonitrile: potential functions to the hydroxyl and methyl group torsions, 203

Mass weighting
The mass weighting problem of potential energy surfaces for chemical reactions: dissociation and isomerisation pathways of HCN, 245

Maximum overlap method
An improved iterative maximum overlap approximation method, 267

Bond strength of equivalent hydridization and the maximum-overlap method, 137

Bond strength of non-equivalent hybridization and the maximum overlap method, 151

Metal–substrate interaction
The influence of proton transfer on the metal–substrate interaction in the active sites of zinc dependent enzymes, 113

MRD-CI calculations
Pseudopotential MRD-CI calculations of nickel-containing molecules. Part 1. The electronic ground state of NiH, 25

Multipath transmission
Analysis of multipath transmission of spin–spin coupling constants in 1-X-bicycloalkanes. Part 1. The through-space transmission via the bridgehead carbon atoms, 63

Analysis of multipath transmission of spin–spin coupling constants in 1-X-bicycloalkanes. Part II. Additivity of coupling pathways, 79

N–C–O units
Ab initio studies of molecules with N–C–O units. Part 1. Methylaminomethanol, 1-methoxymethylamine and 1-methoxy-*N*,*N*-dimethyl-methylamine, 235

Nucleic acid–protein interactions
Molecular-orbital study of the effect of water molecules on nucleic acid–protein interactions, 129

Nucleophilic halogen displacment
Cyclic and open-chain carbonium ion intermediates in nucleophilic halogen displacement: 2-chloroethanol, 2-chloroethanethiol and their 1,3-propane homologues. A theoretical ab-initio MO approach, 177

Polyazocyclohexanes
Ab initio gradient conformational analysis of polyazocyclohexanes: 1,4-diazocyclohexane, 1-3-diazocyclohexane and 1,3,5-triazocyclohexane, 223

Propene
MNDO study of the radical addition of hydrogen halides to ethylene and propene, 213

n-Propylamine
A comparative ab initio MO study of internal rotations in ethylamine and n-propylamine, 327
Proton transfer
The influence of proton transfer on the metal–substrate interaction in the active sites of zinc dependent enzymes, 113

Quasimolecular structure
A study of core effects in quasimolecular structure, 43

Substituted pyrylium salts
Stability of substituted pyrylium salts and the corresponding 2-H- and 4-H-pyrans, 261
Substitutent effects
Substituent effects on the strength of single bonds and in free-radical chemistry, 97

Through-space transmission
Analysis of multipath transmission of spin–spin coupling constants in 1-X-bicycloalkanes. Part 1. The through-space transmission via the bridgehead carbon atoms, 63
Transition-metal complexes
Analysis of chemical bonds in some transition-metal complexes, 159

Water
Molecular-orbital study of the effect of water molecules on nucleic acid–protein interactions, 129

Zinc monohalides
Ab-initio calculations of the electronic structure and properties of the diatomic zinc monohalides ZnX (X=F, Cl, Br, I), 295
